

## Dräger Configuration and Evaluation Software

Save measurement results, professionally configure gas detection instruments and viewing performance data – all that is possible with the tailor-made Dräger software.

## Benefits

---

### Configuration of gas detectors

The software CC-Vision is the premium choice to configure your portable gas detector: easy use, comprehensive possibilities for configuration and saving individual settings. Moreover, CC-Vision can generate templates, used by X-dock® to configure complete gas detector fleets. The best: CC-Vision is free of charge!

---

### Data evaluation

The software GasVision 7 is the key to a beneficial analysis of data collected by portable gas detectors. Analysing the graph, calculating average and finding peak values, creating excel exports and printing tables and charts – GasVision 7 is the ideal tool.

In conjunction with X-dock Manager, GasVision 7 gets data logger read out by X-dock with a simple mouse-click.

---

### Calibration

CC-Vision can show the step response during calibration and can document the calibration results. If you don't own an X-dock system for calibration, CC-Vision is the next best way to ease your life.

---

### Real time measurements

GasVision 7 supports most of the Dräger portable gas detectors in regards to real time measurements. See the values immediately on your PC while the gas detector is measuring it.
